CONTROL INVADER

Difficulty: Hard

Faction: Invaders

Strategy: Control the game by disrupting your opponents' plans, while your massive ships overpower them.

Game plan:

- Your win condition is to survive long enough to establish control over the game.
- In the early game, treat your base's durability a resource, and use the extra card draw option to build a large hand
- In the midgame, keep resources available whenever possible to react to your opponents' threats
- In the late game, use your Darts to steadily chip at your opponents' bases, reducing their durability enough for an Energy Bomb or a Noble Sacrifice to finish them off

- If you can't reliably finish off your opponents, add a second Energy Bomb to your arsenal
